500GAL INDIVIDUAL WIRE BASKET

Optional Stackable Lifting Basket for the 500GAL Decarbonator®

PRODUCT DESCRIPTION

The 500GAL Individual Wire Basket is an optional galvanized wire mesh container fitted with a reinforced stainless steel lifting frame, bolted securely to the basket, for use with the 500GAL Decarbonator® and H500 Electric Gantry Hoist.
Two Individual Wire Baskets fit side by side within the 500GAL Decarbonator, allowing loads to be separated and handled individually.
The baskets are stackable, enabling multiple baskets to be prepared and staged for cleaning. While two baskets are undergoing the cleaning cycle, additional baskets can be loaded and held ready for exchange, helping reduce downtime and improve operational efficiency.

KEY FEATURES

- **Reinforced Lifting Frame:** Stainless Steel lifting frame bolted to the wire mesh container.
- **Individual Basket Handling:** Each basket can be raised and lowered independently using the H500 hoist.
- **Side-by-Side Configuration:** Two baskets fit within the 500GAL Decarbonator.
- **Stackable Design:** Multiple baskets can be stacked for storage and staging, subject to safe stacking limits.
- **Continuous Workflow:** Additional baskets can be preloaded while two baskets are being cleaned, allowing efficient changeovers.
- **Galvanized Wire Mesh:** Open mesh construction allows cleaning solution to circulate around the contents.

OPERATING REQUIREMENTS

Only one Individual Wire Basket may be lifted at a time using the designated lifting points and H500 Electric Gantry Hoist.
DO NOT LIFT TWO INDIVIDUAL WIRE BASKETS SIMULTANEOUSLY.
Ensure the load is evenly distributed and the lifting frame and bolted connections are secure before lifting. Observe the approved working load and stacking limits.

DIMENSIONS & WEIGHTS	
Dimensions W × D × H	39½" × 31½" × 33" (1000 × 800 × 840 mm)
Net Weight	130 lb (59 kg)
Shipping Dimensions	40" × 32" × 33" (1000 × 800 × 840 mm)
Shipping Cube	24.4 ft^3
Mesh Opening:	50 mm x 50 mm
Wire Diameter:	6 mm
